ASX AND MEDIA RELEASE

April 30, 2008

**Quarterly Update - QRSciences turn maiden profit for quarter
and announce plans to spin-off and list technology assets in
United States**

QRSciences (ASX:QRS) (QRSNY:PK) today announced that it had its first profitable quarter and that plans are well advanced to list the Company's technology assets in the United States. Net after-tax profit for the third quarter was approximately \$0.4M.

The Company's proprietary technologies are making steady progress including receipt of the first royalty payments from General Electric Security (GE Security) and the commissioning of two QXR1000 units for deployment in Iraq and delivery of two modified T303 units to China. The Company's 30.2% owned associate, Spectrum SDI (Spectrum) has also made significant progress with the first delivery of CastScope production units and commencement of the US airport roll-out under the previously announced contract with TSA.

The Company anticipates listing the technology assets through the acquisition of a public company in the US and then possibly making a pro-rata stock dividend in the new US entity to existing shareholders in QRSciences. The Board are considering the tax and legal implications of a transaction of this nature and will report back to the market as soon as practicable.

The Australian based distribution business, QRSciences Security Pty Ltd, which comprises Q Video Systems posted a net profit of \$0.327M in the March quarter and a net profit of \$1.15M March YTD. The net asset position of this unit strengthened to \$4.845M, up \$827K from the close of last quarter.

Overall, cash flow was markedly improved over the previous quarter with the Company continuing to invest cash back into the business and Spectrum. The Company expects to continue building its shareholding in Spectrum over coming months and holds an option to buy the remainder of Spectrum's ordinary shares until September 2009.

Update on Proprietary Technologies and Products:

- The QR (Quadrupole Resonance) business unit was restructured in the second quarter of FY08 to subsist on contract R&D. One time write-offs associated with the restructuring were taken in the first quarter.
- The Company was awarded an \$ 840K contract from the National Security Science and Technology Unit branch of the Department of Prime Minister and Cabinet for the development of next generation screening solutions.

For personal use only

- The Company received its first Royalty payment from General Electric Security (GE Security) for the licensing of its technology in the Shoe Scanner products being developed by GE Security.
- Rapiscan and QRSciences have commissioned and will be deploying 2 QXR1000 units to Iraq to be used for military security applications
- Spectrum have completed installations of their SentryScope at Naples Airport, Italy; a government sale through ADT in the US and Kilburn Police in the UK. Columbia University, New York has purchased a unit for permanent installation and San Diego Trolley has purchased additional units for its maintenance yard.
- Spectrum San Diego (Spectrum) continues to roll-out its CastScope product through a \$42M IDIQ (Indefinite Delivery Indefinite Quantity) order received from the Transportation Security Administration (TSA) with the first installations occurring in May. Siemens Government Services are sub-contracted to handle the in-field service and maintenance.
- Spectrum has also received a \$1M second phase grant from the Technical Support Working Group (TSWG) for the development of the CarScan product. The Company believes that the low cost and convenience of the product coupled with performance will make it very successful in applications related to border security and critical infrastructure protection. Spectrum expects commercial sales from this product in second half of CY09.

The Board and Management of QRSciences continue to believe that the Company's assets are significantly undervalued by the market, and are continuing to work diligently on a plan to unlock and realise that value for shareholders. Reflecting that belief the Director's have purchased approximately 2% of the Company's ordinary shares over the past ninety days.
